

# Håkon Bekken

Applied Robotics student at NMBU with background in cyber defence and ICT.  
haakon.bekken@hotmail.com | +47 472 36 770 | Nedre Pentagonvei 26 | [GitHub](#)

## EDUCATION

|                                                                                                |             |
|------------------------------------------------------------------------------------------------|-------------|
| <b>Applied Robotics (Anvendt robotikk)</b><br>Norwegian University of Life Sciences (NMBU), Ås | 2024 – 2029 |
| <b>Cyber Technician</b><br>Norwegian Armed Forces                                              | 2019 – 2020 |
| <b>Craft Certificate in ICT Service (Fagbrev)</b>                                              | 2023        |
| <b>Driver's license:</b> Class A (motorcycle), Class B (car)                                   |             |

## TECHNICAL SKILLS

|                          |                                                            |
|--------------------------|------------------------------------------------------------|
| <b>CAD and 3D design</b> | Autodesk Fusion 360, Autodesk Inventor, 3D printing        |
| <b>Programming</b>       | Python                                                     |
| <b>Data Network</b>      | Cisco network systems                                      |
| <b>SysAdmin</b>          | Windows & Linux server administration                      |
| <b>Infrastructure</b>    | Fiber optics, server environments                          |
| <b>Communications</b>    | Radio communication systems (HF, VHF, UHF, SHF, satellite) |
| <b>PCB Design</b>        | Basic understanding of Altium Designer                     |

## WORK EXPERIENCE

|                                                                                                 |             |
|-------------------------------------------------------------------------------------------------|-------------|
| <b>P8 CIS - administrator</b><br>Royal Norwegian Air Force (Luftforsvaret)                      | 2023 – 2024 |
| <b>FSP Specialist</b><br>Norwegian Cyber Defence (Cyberforsvaret)                               | 2020 – 2023 |
| <b>Conscript, Signals Battalion</b><br>Norwegian Armed Forces                                   | 2018 – 2019 |
| <b>Auxiliary nurse (Summer job and part time)</b><br>Jevnaker omsorgs- og rehabiliteringssenter | 2017 – 2020 |

## PROJECTS (ONGOING, VIA EIK LAB)

**Clench** – Embedded sensor integration in a mouthguard (wearable sensor device).

**Patronus** – 3D modelling and design for an anti-drone system, in collaboration with Kongsberg Defence & Aerospace.

## LEADERSHIP & EXTRACURRICULAR

**Administration Manager** – Robotnik (Student Association)

**Mentor** – Eik Lab
